

Ideation Phase

Brainstorm & Idea Prioritization

Date	18 June 2026
Student Name	SIDDANI SRI CHARAN (charaniamgreat@gmail.com)
Team ID	
Project Name	ShopEz
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming facilitates a structured yet creative environment for identifying software requirements and architectural solutions. This phase focuses on prioritizing high-impact features for the ShopEz MERN platform while ensuring technical feasibility within the project scope.

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

Step-1: Selection of the Problem Statement

Problem Identification: Modern consumers require a unified, secure, and fast e-commerce experience across devices. Existing solutions often lack intuitive admin-side management or real-time order tracking in a single integrated stack.

Selected Problem Statement: "How can we build a full-stack MERN application that provides a frictionless product browsing and checkout experience for users while offering a streamlined, secure management dashboard for administrators?"

Step-2: Brainstorm, Idea Listing and Grouping

Categorization of core ideas identified during the solo ideation session:

User Interface (Frontend)

- React-based product catalog
- Responsive design for Men/Women/Kids
- Dynamic search and filter bars
- Redux for shopping cart state

Backend & Logic

- JWT-based secure user authentication
- Express.js RESTful API architecture
- Order tracking and history logic
- Real-time inventory deduction

Database (MongoDB)

- Normalized schema for User/Products
- Category-based indexing for speed
- Cloudinary integrated image storage

Admin Features

- Protected Admin Dashboard
- Product CRUD operations
- Order fulfillment management

Step-3: Idea Prioritization

Evaluation of project components based on Importance vs. Feasibility to ensure a successful MVP launch.

Feature Category	Importance (High/ Med)	Feasibility (High/ Med)	Priority Level
MERN Integration & DB Setup	High	High	Critical (Phase 1)
Authentication (User/Admin)	High	High	Critical (Phase 1)
Admin Dashboard CRUD	High	Medium	High (Phase 2)
Search & Filter Logic	Medium	High	Standard (Phase 2)
Real-time Order Tracking	Medium	Medium	Secondary (Phase 3)
